How Medicine Delivery will work

A note to the Volunteers who are delivering medication for isolated residents...

We'd like to make you aware of the system that will be employed by the pharmacy when you collect prescription medicines for someone in your Area. (The pharmacy has an existing delivery person, who they know will need additional help at some stage. In addition residents in your area may ask you directly).

These will already have been paid for: indeed, in many cases such prescriptions are already free for those who are eligible.

1. The pharmacy will ask the volunteer for the name and address of the patient.
2. Provided this is correct, they will ask the volunteer collecting and then delivering the prescription to sign it and write their name and address on the prescription.
