

CORONA VIRUS LOCAL ASSISTANCE

Eton & Eton Wick Coronavirus local assistance

Guidelines for Safe Home Deliveries

If you have any symptoms characteristic to Coronavirus, such as a fever, sore throat or cough do not agree to assist the self-isolated recipient.

It is essential that no physical contact is made with the self-isolating individual and the deliverer avoids entering the home of the recipient.

The deliverer is requested to take whatever steps possible to minimise any contamination, following Government advice

By taking the following safe practices any risk to the deliverer and recipient will be minimised:

1. Using telephone or email contact, agree with the self-isolated recipient the errand required:
 - deliver food/provisions from the Eton stores.
 - deliver medicines etc from the pharmacy.
 - take post from homes to the post box.
2. For their safety and yours, explain you will not be able to go into their home.
3. If you have agreed to drop off shopping or other essential items, confirm with the recipient:

- Approximately when you will arrive;
- That you will ring the doorbell or knock on the door when you arrive;
- Show some photo ID if requested;
- That you will leave the shopping at the front door but as a precautionary measure you will distance yourself approximately 2 metres from their door;
- That you will wait for the recipient to open the door and retrieve the items before departing;
- That any further requests or enquiries made by the recipient must be communicated back to the Eton Coronavirus Help Hub (07586997367 or hubsupport@etoncorona.com).
